

# Antimicrobial Medical Adhesive Tape

A critical technological advance in the field of medical adhesive tape : TrioMed incorporates a powerful antimicrobial to control microbiological contamination (bacteria, viruses , spores)

## Advantages of the TrioMed Antimicrobial Medical Adhesive Tape

- Proven to kill at least 99.99% of Staphylococcus aureus MRSA, Enterococcus faecalis VRE, Klebsiella Pneumoniae, Pseudomonas aeruginosa, Escherichia coli, Acinetobacter baumannii, and Influenza A H1N1
- Non- cytotoxic and non-irritating

**Neutralizes 99.99% of harmful pathogens on contact**

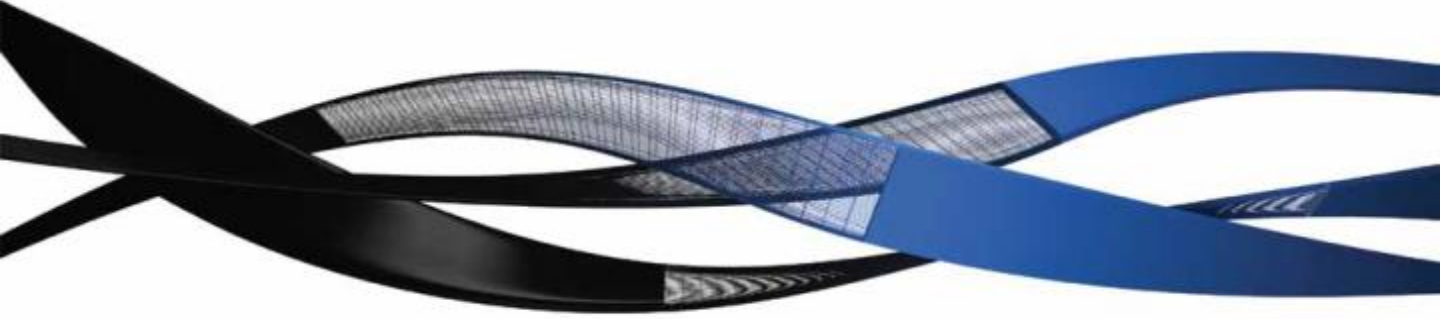

## Adhesive Tapes As Potential Source of Hospital Infections

All Scientific and clinical studies indicate that medical & surgical tapes commonly used in healthcare settings are contaminated with pathogenic bacteria and may serve as a significant source of infection.

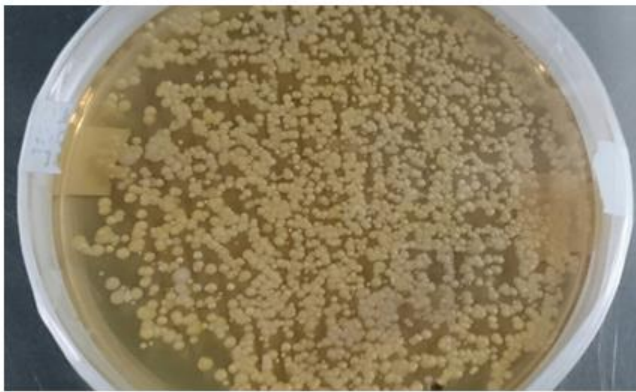

The **TrioMed** technology incorporates a broad-spectrum and powerful Tri-iodide antimicrobial engineered to address this infection risk.

The **TrioMed** Antimicrobial Medical Adhesive Tape will effectively kill harmful contaminants and is the only existing solution to stop this widespread contamination.

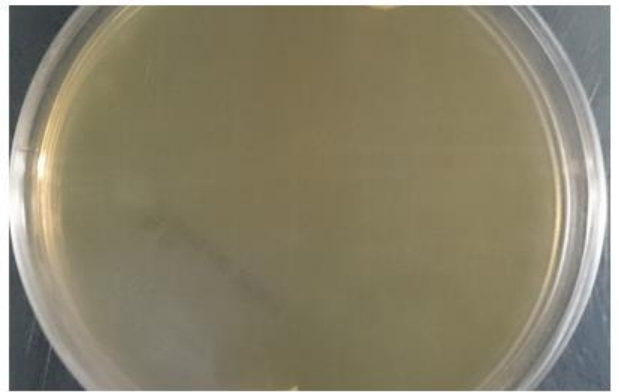

Study comparing the contamination of commercially available medical tape versus TrioMed Tape after only 12 hours on a patient.

\* Bacterial colonization on petri dish  
**Commercially available Medical Tape**

VS

\* NO colonization on petri dish  
**TrioMed Antimicrobial Medical Adhesive Tape**

**Conclusion:** As evidenced by pictures above, the commercially available medical tape's external surface is microbiologically contaminated, while the TrioMed Adhesive Tape maintained its microbiological integrity.
